May 26 - 30, 2024 - Barcelona, Spain

With the colossal impact of Generative AI in Education and Training industry, it is fundamental to pursuit a correct and sustainable way to manage all the given opportunities.

Topics, issues, and challenges under the point of view of learning effectiveness remain still specific of the employee development. Methods and technologies may vary but provide new challenges and issues to improve the users' experiences.

So, it's not late or anachronistic to deal with all the learners' needs, digital learning materials or course organization and tools. In this complexity, a Human-Centered approach is a way to design effective and meaningful experiences. Learning is a journey that requires flexible and different training models and instructional design to be shaped and driven.

In this special track, we welcome experiences and field work, examples and tools, ideas and debate on new learning methods and emerging modalities, problems, and opportunities.

We consider this special track a way to share a perspective on how learners' needs are evolving in this changing world.

Topics include, but not limited to :

- Fast and self-guided training models
- Engaging formats and immersive or interactive experiences,
- AI based technologies and Generative AI applied to learning design and tools
- Learning behavior Understanding and organizational issues
- Environment to support people engaging in informal learning
